

What are my treatment options?

1

2

3

What do you think is the best way to go and why?

When will the treatment/operation start and how can I prepare?

What are the side effects I need to worry about?

How will we know if the treatment is working, and when?

What can we expect from the results, percentage wise?

Do I need to do any tests beforehand?

How can I contact you if I have more questions?
